EDUCATION

Indian Institute of Information Technology, Bhagalpur <i>B.Tech in Computer Science Engineering</i>	2023 – 2027 CGPA: 7.22
Ben Hur Public School <i>Senior Secondary (Class XII)</i>	2022 91%
Ben Hur Public School <i>Secondary (Class X)</i>	2020 92%

TECHNICAL SKILLS

Languages: JavaScript, C++, Python, Java, SQL
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control
Frontend: React.js, Tailwind CSS, Context API, React Router
Databases: MongoDB, Mongoose **Tools & Platforms:** Git, GitHub, Postman, Cloudinary, VS Code, n8n
Core Concepts: MVC Architecture, Atomic Transactions, OTP Authentication, File Uploads, Error Handling
Problem Solving: 350+ DSA problems solved across platforms

INTERNSHIP

SalesifyMe <i>Automation Engineering Intern</i>	Oct 2025 – Present Remote
- Designed and deployed API-driven automation workflows using n8n, webhooks, and third-party service integrations. - Integrated Gemini and OpenAI APIs into backend pipelines for real-time intelligent data processing. - Identified and resolved bottlenecks in production workflows, improving reliability and reducing failure rates. - Enforced structured validation and data normalization to ensure consistent, predictable outputs across pipelines.	

PROJECTS

Multi-Tenant Workspace Management System <i>Full-stack role-based project and task management platform</i>	2026 🐙 GitHub
- Architected a full-stack multi-tenant system supporting workspaces, projects, tasks, members, and role-based permissions across all layers. - Implemented JWT authentication with httpOnly cookies and OTP-based password reset via Nodemailer and Gmail App Password. - Enforced role-based access control with workspace admin and project lead roles governing member and task operations. - Built task management with assignee validation using Promise.all, commenting system, and file/link attachments via Cloudinary. - Designed RESTful APIs following MVC architecture with centralized error handling and structured response formats.	
Banking Management System <i>Secure full-stack banking system with atomic fund transfers and authentication</i>	2026 🐙 GitHub
- Built a full-stack banking system supporting user registration, login, account creation, and inter-account fund transfers. - Implemented atomic transaction handling ensuring data consistency during concurrent and simultaneous transfers. - Designed balance validation and structured error handling for secure and reliable financial operations. - Integrated JWT-based authentication with protected routes and role-based access control across all endpoints.	

ACHIEVEMENTS

Smart India Hackathon 2025 — Selected for Round 2 out of thousands of teams nationwide	
Competitive Programming — 350+ problems solved across platforms	Ongoing
Certification — Python for Data Science — Udemy	2024
